Project: Hail Mary by Andy Weir

The sun's light is fading. Earth is on the brink as temperatures drop and ecosystems die. Our only hope is a suicide mission to a distant star system and a whole lot of science! The premise of Project: Hail Mary by Andy Weir seems bleak, but it is, without a doubt, one of the most uplifting, hilarious, and heartwarming books I read this year. Weir writes with imagination, suspense and his characteristic humor as Ryland Grace, a nerdy high school Science teacher throws himself in with our planet's best scientists to cobble a plan so desperate, it couldn't possibly work. Will humankind survive? Pick up this thrilling novel and find out!
